Focus on your question or intention.

Shuffle the deck and spread out the cards.

Choose four cards, one at a time, and place them from right to left as shown.

Please note that the spread does not reflect the Polarity elemental order.

You may choose several sets of four for deepening or clarifying your question.

The meaning of a card is strengthened if it is in the placement that corresponds to its element:

For example: a fire card in the fire (first) placement

Weakened cards are as follows:

Water card in a fire placement

Fire card in a water placement

Earth card in an air placement

Air card in an earth placement

More than one card of the same element or number strengthens the meaning of those cards in the spread.

Positive/Negative Cards

What do you do when a card is reversed?

Typically, reversals indicate the opposite meaning of a card. When a Polarity Tarot card is reversed it is interpreted as contracted or stagnant energy that needs attention.
